

SMART Notebook Facts Activity View the video tutorial at <http://www.drsponder.net/SMART/facts.html>

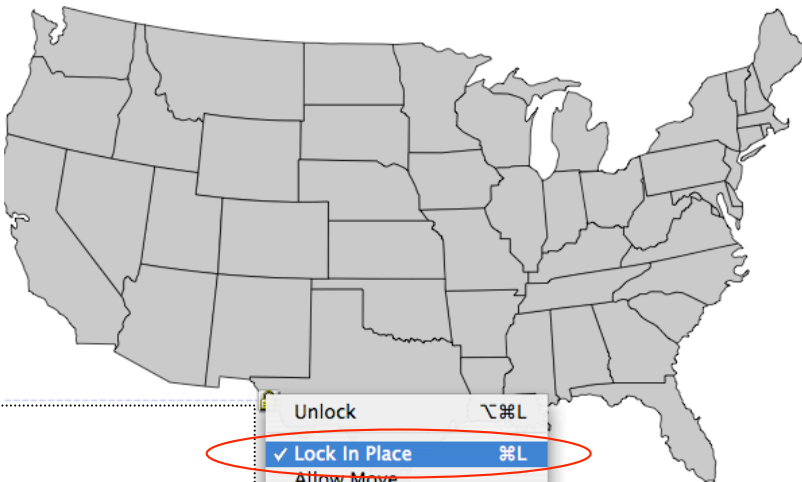

1. Open Notebook. Save as “States”
2. Search the Gallery for a map of the USA that has state outlines and drag it on the board.

3. Go to the Shapes tool and select a box. Go to the Color tool and select a white outline with white fill.

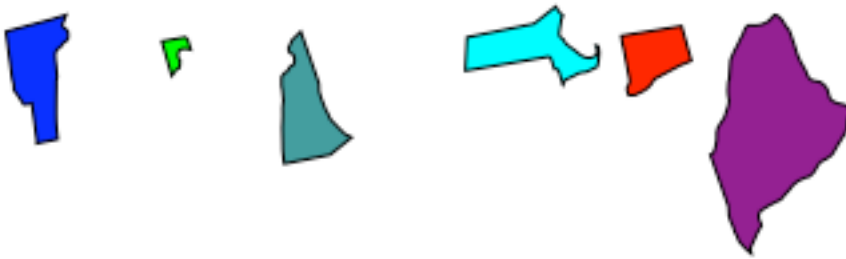

4. Cover up Alaska and Hawaii which are incorrectly portrayed on the map. Use the white shape to hide the two states and then lock that shape in place.

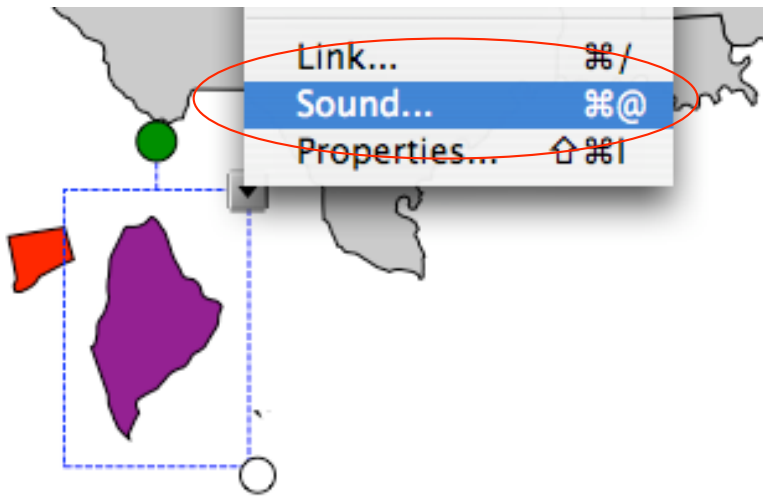

5. Search the Gallery for USA state maps

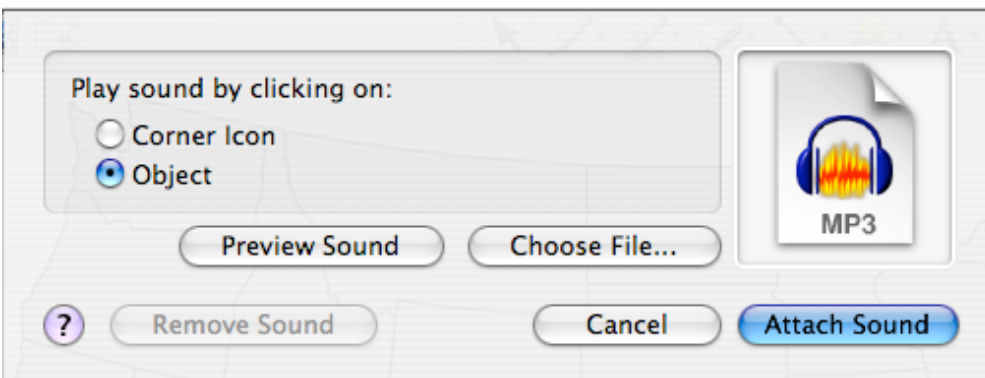

6. Locate the six New England states and drag them onto the board.

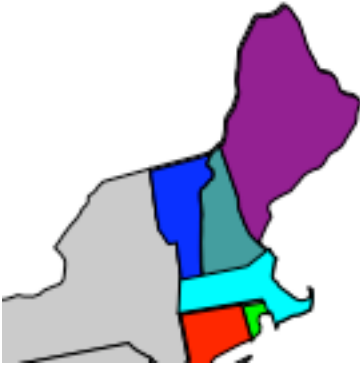

7. Attach the state name to each state by clicking on each one and adding the sound to the object.

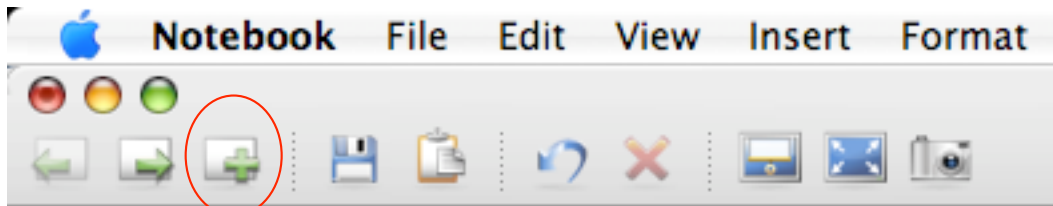

8. Choose the sound. You can use Audacity, to record audio, which is a free program.
<http://audacity.sourceforge.net/download/>

9. Do the same process for the rest of the New England States and then drag them onto the map in the correct location.

10. Make a new Notebook page

11. On this Board you will make questions about the presentation. Use the same procedure that you used to cover up Alaska.

Type five questions. Cover up each with a white box. Put a question on the box. Then call students to answer and uncover the answer.

Homework: Pick any other region of the USA and make a SMART Notebook presentation like this one. Include sound and at least five (5) questions, but no more than ten questions.
